

The Aljezur Parish Council has partnered with CTT to implement CTT Locky at the Aljezur Parish Council headquarters.

The new service, which allows you to pick up purchases online, enables you to receive your parcels on the day and at the time that suits you best, without having to wait at home for them. The moment your order arrives, you receive an SMS or an e-mail with the pick-up code, and all you have to do is go to the Aljezur Parish Council to collect your order(s). This service (available 24 hours a day, seven days a week) also has a sustainability component, as it makes it possible to reduce the number of delivery vehicles on the streets, thus reducing carbon emissions.

Locky lockers can receive orders from different carriers via the free "virtual address" service. This service allows each user to use their favorite locker as their parcel delivery address. This allows any parcel, from any carrier, to be sent to the CTT Operational Center and then forwarded to the locker. At the moment, we have two carriers that supply Locky lockers directly: CTT and Nacex.

With e-commerce becoming more and more of a reality in everyday life, and with a very significant increase, the Aljezur Parish Council intends to expand the Locky network to various parts of the parish.

There are two ways to use this new service:

1. At the checkout of your online purchase, if you have the option of "CTT Locker" delivery:

- Choose the locker that is most convenient for you as the delivery point, and you can already choose Aljezur as the destination;
- When the package is in the "Locky" locker, you will receive an SMS with the secret PIN;
- Pick up your order within 5 working days.

2. At the checkout of your online purchase if you do NOT have the option of delivery to "CTT Locker":

- Register at <https://www.ctt.pt> by clicking on the "Receive in a Locky" locker option;
- Register and select the locker where you want to receive your orders and your virtual address will be generated;
- At checkout, use the virtual address generated by the CTT Lockers Service (regardless of your carrier) as the delivery address;
- When the order is in the "Locky" locker, you will receive an SMS with the secret PIN;
- Pick up your order within 5 working days.

Start using the Aljezur locker today: from now on you don't have to stay at home waiting for your parcel, it's waiting for you!
